Introduction:

Santiam Canyon School District (the “District”) is a rural school district east of Salem in Mill City, serving students from Mill City, Gates, Detroit, Idanha, Marion Forks and the areas of Breitenbush and the Little North Fork. Our campus is tightly fit in contiguous spaces with two school buildings: Santiam Elementary School (K-6) and Santiam Junior/Senior High School (7-12).

An overview map of the District campus is below, with the property lines outlined in yellow.

The District had a Facilities Feasibility Study conducted in 2001 and is currently being updated now. This information will contain major repairs needed within the current buildings and possible costs associated with these projects. This information will become available to the selected contractor when it is completed.

With the assistance of the District and a Long Range Facilities Planning Committee, develop a Long Range Facilities Plan (LRFP) which will guide facilities expenditures and timeframes and set the direction for investment in school facilities which will provide the best learning environment for the District’s students.

The LRFP will be the District’s Master Plan and become the foundation of the District’s annual maintenance plan, operations plan, capital budget and long range facility renovation program and will also fulfill the requirements of ORS 195.110.

Informal Selection Process:

Pursuant to OAR 137.048.0210, the District shall use the informal selection procedure described in this solicitation to contract with a consultant when the Estimated Fee is expected to not exceed \$150,000.

Scope of Work:

- **Introductory kick off meeting with staff to discuss outcomes, process, goals, etc.**

Consultant will participate in a kick off meeting with District staff to discuss process, anticipated outcomes, roles, community engagement goals, schedule and budget.

- **Long Range Facility Plan Committee (LRFPC) Meeting planning**

Consultant will plan each meeting in conjunction with District staff. Meeting planning may include creating agendas, ensuring pertinent background information is available, including discussion papers detailed below, and provided to the LRFPC in advance of meetings, clearly identifying goals and outcomes for each meeting, etc.

- **Long Range Facilities Planning Committee (LRFPC) outreach**

District leadership will invite individuals to participate in LRFPC meetings. Invitations will include hours of commitment, anticipated outcomes, roles, expectations, etc. Consultant will prepare meeting reminders and meeting materials for LRFPC participants. District will send all written communications to members.

- **Facilitation (five to seven - two hour meetings)**

Consultant will prepare for and facilitate approximately five to seven LRFPC meetings. Each meeting will focus on selected topic areas of discussion and will provide opportunity for public comment.

- **Development of discussion papers**

LRFPC meetings will center on discussion of specific issues, which will be determined in advance. Key topics of the LRFP will be discussed through a series of white papers. Consultant is responsible for development of these white papers, outlining the key issues, background and options that the LRFPC will discuss and ultimately recommend a direction/decision point.

- **Note taking and summaries for each meeting**

Consultant will provide note taking staff during each meeting and provide summaries for each meeting including attendees, discussion, comments, main themes and next steps. Consultant will prepare and deliver these summaries to District staff for one review then revise for quick turnaround for publication/dissemination by the District.

- **Bi-weekly planning meetings (as requested)**

Consultant will meet with District staff twice a month to discuss progress, feedback received, process and next steps.

- **Plan for broad public input**

Consultant will work with District staff to assist with public participation goals, objectives and tools to solicit broad public input into the draft LRFP.

ORS 195.110 - REQUIRED TOPIC AREAS

Santiam Canyon School District is preparing a Long Range Facility Plan which would be compliant with ORS 195.110. The plan will likely include discussion/consideration of the following topics:

Update/validate enrollment projections by school age group through 2025

Document the methodology used to determine school enrollment forecasts and obtain agreement with Facilities Planning Advisory Committee (LRFPC) on enrollment forecast methodology. Review school site size. Develop parameters for elementary, middle and high school site sizes.

Determine/validate school capacity formula

Develop objective criteria to determine whether adequate student capacity exists at each school. The local jurisdiction will need to adopt the criteria before it can be applied. Other activities related to this task include researching similar sized school districts to determine the school capacity formulas/methodologies they use to calculate school capacity, consider methods for more efficient use of schools, identify needed improvements to existing District facilities based on the agreed upon school capacity, etc.

Identify instructional changes that may have impact on facilities

Identify program/curriculum changes that will impact school facility needs. Special education, full-day kindergarten, English as a second language, international baccalaureate programs and physical education program needs may place new or different demands on school facilities. The original program and grade configuration for some schools may be different than current use.

Identify alternatives to construction, financing options, future land needs for facilities

Identify and consider alternatives to school facility construction, financing options to fund future capital construction and the District's future land needs to accommodate new facility construction.

Review school condition assessments and confirm needed improvements to existing facilities

The District will separately prepare Facility Condition Assessments. Consultant team will review and confirm the accuracy of the FCA/FCI provided. Develop a methodology for updating the facility condition assessment of some or all District facilities.

Consultant Deliverables:

Develop with staff input and direction:

- Background pieces to be included in work notebooks for LRFPC members.

Evaluation Criteria:

Proposals will be evaluated on the criteria listed in the *Proposal Requirements* section of this document using the points assigned in that same section.

Evaluation Process:

The selection committee will score each submittal on the basis of responses to the evaluation categories. Submittals will be rated based upon the weights assigned to each item as noted in the parentheses.

Each member of the evaluation committee will rank each firm in each category between 0 and 5, and multiply that number by the weight assigned to the category. The individual evaluation committee members will then total the weighted score from all of the criteria to obtain the total score. The result of this total score will be used to rank all respondents.

The RFP also requires reference information for your firm. The District will utilize this information and any other independently obtained references that can provide background on the firm. This information will not be separately scored, but results obtained from these and/or other reference checks will be utilized in evaluating and scoring in the other categories and in the final ranking.

The evaluation committee will meet and use the individual evaluation committee member rankings as a beginning of their discussion. The discussion of the responses will include firm strengths and weaknesses and the individual evaluation committee member scorings. The committee reserves the option to interview finalists as ranked from the results of the evaluation committee discussion and scoring. The committee reserves the right to seek clarification of each proposal.
